

INVEST IN PROFESSIONAL DEVELOPMENT WITH THE AABB CELLULAR THERAPIES CERTIFICATE PROGRAM

Training Request for Enhanced Job Performance.

CAPABILITY

- Provides students an overview of important elements in the cellular therapy field
- Curriculum covers scientific, operational and regulatory issues
- Can be used to establish minimum competency as part of a training program
- Scenario-based assessments at the end of each module reinforce content for 'real-world' learning
- Certificate of Completion conferred following successful completion of requirements
- Expand and enhance personal understanding of issues and processes critical to career and professional development
- Continuing education credits available

CREDIBILITY

- AABB has partnered with the George Washington University – experts in providing online education
- The faculty represent a cross-section of professionals who participate in the field
- Developed using educational adult learning principles

FLEXIBILITY

- Self-paced
- Convenient: online – no travel
- Additional readings support the topics and serve as reference materials for future application
- For students permitted to follow program during work hours – allows study during periods of low workloads
- Up to 1 year to complete

MARKETABILITY

- Employers may purchase multiple programs
- Institutional bulk discounts available
- Stand out among peers, provides added value to employers, acknowledgement of the professional community
