

December 5, 2018

The Honorable Mitch McConnell
Majority Leader
U.S. Senate

The Honorable Paul Ryan
Speaker
U.S. House of Representatives

The Honorable Charles E. Schumer
Minority Leader
U.S. Senate

The Honorable Nancy Pelosi
Minority Leader
U.S. House of Representatives

Dear Majority Leader McConnell, Speaker Ryan, and Minority Leaders Schumer and Pelosi:

On behalf of the undersigned organizations, representing public health, healthcare providers, biotechnology innovators, and researchers, we are writing to encourage you to pass the Pandemic and All-Hazards Preparedness & Advancing Innovation Act (PAHPAI, S. 2852 & H.R. 6378) before Congress adjourns for 2018. The Energy & Commerce and Health Education, Labor & Pensions (HELP) Committees have made tremendous, bipartisan progress on this important legislation, and it would be a setback for our national health security to delay reauthorization until 2019.

The recent wildfires, hurricanes and multistate outbreaks have demonstrated that all sectors – public health, healthcare and private sector – play a critical role in saving lives during disasters and outbreaks. PAHPA is the backbone of our nation’s health security, providing the U.S. Department of Health and Human Services (HHS) with authorities for preparing the healthcare and public health systems for disasters and strengthening the medical countermeasures enterprise. The legislation addresses some gaps we have seen in recent responses, such as the speed of funding for public health emergencies, development and deployment of medical countermeasures for significant threats and preparedness for children in disasters.

We are particularly concerned that several authorities have already expired, including temporary reassignment of state and local personnel and the National Advisory Committee on Children and Disasters. Other authorities will expire in December, including limited antitrust exemption and other provisions critical to HHS contracting. We believe that time is of the essence in reauthorizing these important authorities.

We commend the work of the committed Senators, Representatives and their staff who have devoted considerable thought to this legislation. Our organizations are committed to our nation’s health security, and we remain ready to assist in order to see this legislation enacted into law before the end of the year.

Sincerely,
